EDUCATION

- Bachelor of Computer Science, Babcock University, Nigeria** Ogun state, Nigeria
Babcock University; September 2019 - July 2023

SKILLS SUMMARY

- Skilled in:** JavaScript, Python, PHP, C, Typescript, SQL, JAVA
- Frameworks:** React, React Native, Django, Node
- Development Tools:** GIT, Tailwind Css, SCSS, Figma, Postman, Redux, Docker, MySQL, AWS, Jira
- Platforms:** Linux, Windows

EXPERIENCE

- Axxess Technologies** Dallas, Texas USA
Frontend Engineer (Full-time) (Remote) June 2024 - Present
 - Developed and enhanced a US-based Homehealth hospice solution using the Aurelia framework, focusing on patients nearing end-of-life care.
 - Built and improved existing features while leveraging tools like FormBuilder and YAML to streamline development and enhance system capabilities.
 - Contributed to backlog refinement, prioritization and estimation on various Jira Software, Story point estimation and other product issues, optimizing the team's ability to deliver value incrementally.
 - Collaborated closely with Quality Assurance (QA) to conduct post deployment ticket testing across development, staging and production environments utilizing tools like Kibana to analyze and resolve logs.
- HeyHi Ltd** Remote
Frontend Engineer (Part time, contractual) January 2025 - Present
 - Built a football trivia game using React Native with over 500 active users, allowing users to wager real money and win through an engaging mobile experience
 - Utilized React Native debugging tools to improve load times and overall performance, ensuring a smooth and lag-free user experience.
 - Developed a web version of the app with optimized load time and implemented pixel-perfect UI to match design specifications, enhancing user satisfaction.
 - Playstore AppleStore
- Finstaq Technologies** Hybrid
Frontend Engineer (Full-time) January 2023 - June 2024
 - Created a comprehensive fin-tech application with over 6000 active users that enables users to exercise control over their spending by facilitating expense tracking across different accounts
 - Conducted comprehensive testing and quality assurance checks to ensure the application's reliability and at 100% performance, identifying and addressing bugs and issues in a timely and efficient manner.
 - Implemented advanced security protocols, such as encryption and access controls, to ensure that sensitive user data are close to being 100% safe and secure and ensure compliance with relevant regulations
- Creat Technologies** Remote
React Native Developer (Part-time, Contractual) June 2022 - May 2023
 - Spearheaded the development of a React Native application for a fin-tech company that specializes in investment and savings funds for small business enterprises
 - Maintained comprehensive documentation experiencing a 15% increase in productivity, including technical specifications and support materials.
 - Collaborated closely with a team of 9 members and stakeholders, resulting in on-time project delivery and adherence to the allocated budget. Achieved a 95% stakeholder satisfaction rate.

PROJECTS

- Errandboi:** Engineered a React Native-based mobile application, that utilizes a cutting-edge facial authentication system for secure login that allows users to connect with the best service workers in their area. [GitHub Link](#)
- Thender:** Implemented a secure and efficient mobile application for seamless file sharing across multiple devices. Leveraged advanced software engineering techniques and best practices to create a robust and reliable solution. Achieved a file transfer speed increase of 30% and facilitated simultaneous connections of up to 100 devices. [GitHub Link](#)
